

## A SCALED DOWN VERSION OF LUCI® BASIC FOR THE LESS/DEMANDING REPORTER AND BUSINESS USER.

Congratulations with your choice of Luci® office ! Luci® office does not only integrate all functions of a dictaphone into your PDA, but also allows you to quickly send all spoken messages to any email-address. Through its professional broadcast quality compression it is also very quick to send. Everything in digital quality and surprisingly easy to use. While developing this software we focused on ease of use, speed and quality.

**Ease of use**, because the business user does not want to read through complicated manuals or go through many menu's to accomplish the things that the software must do: record the spoken word, file and transmit.

**Speed**, because using less time to accomplish the same as before or even more, gives you more time to do your work.

**Quality**, because you do not want to record your voice in such a garbled way that it could lead to mistakes. And your software must be reliable of course !

If you install Luci Office you will quickly experience the advantages of a dictaphone. And if you already use a dictaphone you can throw away all your old equipment and use 1 device for all your needs: Mobile phone, dictaphone, GPS, email, internet etc.

### The main features of Luci® office are listed below

- Big buttons on screen
- Easy to record the spoken word, to file and to transmit by email or FTP
- Time-saving
- Excellent recording quality
- More advantages of a dictaphone as 1 device is used for all your needs: mobile phone, GPS, email, internet, dictaphone, etc.
- Free helpdesk via email at [support@luci.eu](mailto:support@luci.eu)

### This manual consist of 4 main chapters

---
